Hospital Emergency-Ready

When an emergency strikes, hospitals need to be prepared.

We are thrilled to unveil our cutting-edge mobile app platform, designed exclusively for hospitals to promote emergency plan best practices. Our platform empowers hospital personnel to stay well-informed, secure, and prepared in the face of any emergency. With up-to-the-minute critical information available at their fingertips, both personnel and facilities are kept up to date with the latest emergency procedures.

Provide your facility with a comprehensive digital library, fully prepared for launch, that contains all essential content such as Hospital Incident Command System (HICS), Active Shooter Response, Anti-Terrorism, and much more. Stay informed in real-time of any potential weather hazards or threats, receive timely check-in prompts during or after an emergency, and stay current with the latest workplace policies and advanced security measures.

Take charge of emergency preparedness with our game-changing app platform! With authoritative content and a user-friendly CMS, hospitals can easily transform their emergency response plans into engaging eGuides.

With the help of our app, you'll never be caught off-guard again.

One Solution – Many Tools

Our mix of modules and features has you covered.

Planning Made Simple

Provide all emergency codes and personalized checklists so app users follow your pre- and post-emergency plans, while also monitoring their psychological health after the event.

Knowledge Library

Expand your resource library with informative eGuides and PDFs. Unlock certain eGuides for specific users with workspaces delivery.

Personalized Side Menu

Create a side menu to provide easy access to the most important information, including topical eGuides and critical contact information.

Emergency Response Plan Training modules

Talk to and train your hospital emergency personnel on protocols, HICS procedures, and ongoing mental health support.

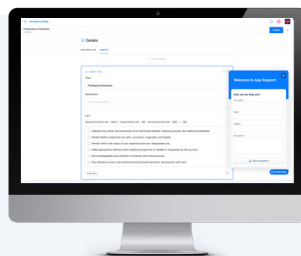

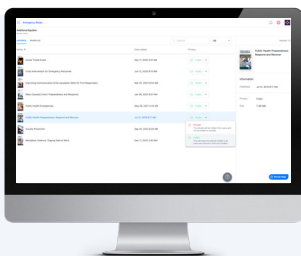

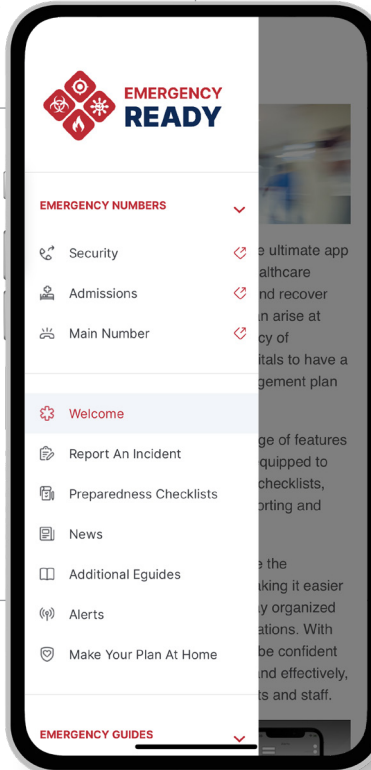

Instant Feedback

Gain insight from your people with modules that encourage two-way communication. Use forms to engage app users in reporting incident details, custom information, and images.

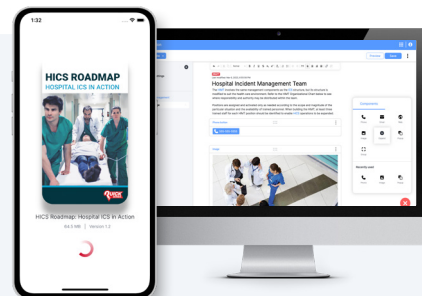

Address Everyone from One App

Build personalized workspaces in your app for users to access specific departmental content.

User-Friendly Portal

Manage your app from any browser using the administrative portal. Changes in the portal instantly appear in the app and users are notified in real-time.

Customized Content

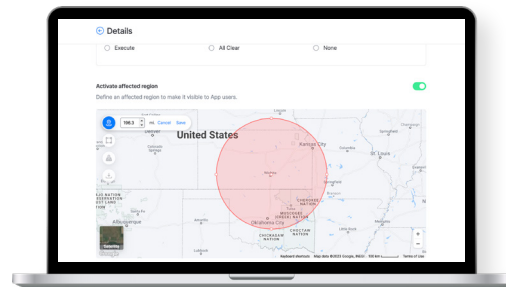

Transform your message into engaging, interactive material. The included Authoring Tool CMS helps you effortlessly create and publish fresh content.

Safety-driven modules within a one-app delivery put vital information at users' fingertips

Alerts

Alerts are used to notify users of current/imminent incidents, emergencies, and disasters.

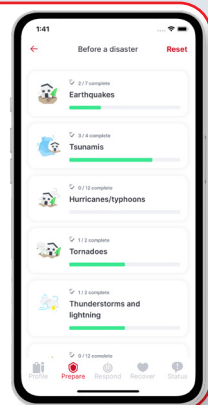

- Update/end alerts as situations evolve.
- Prompt users to check-in following an alert with a one-touch "I am safe" or "I need help" message.
- Seamlessly integrate Federal Emergency Management Agency (FEMA) and National Weather Service (NWS) feeds into your Alerts module. Send geo-targeted push notifications once users accept alert tracking and/or enter one or more zip codes.

Make Your Plan

Give employees the ability to organize and prepare for emergencies beforehand.

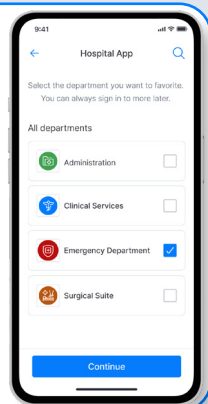

- After information is entered, plan specifics are automatically generated according to best practices.
- The plan is displayed in three distinct sections, each with steps to guide preparation, response, and recovery efforts.

Workspaces

Users access departmental content in your app.

- Address all your users by publishing content globally to all workspaces.
- Grant admins access to publish content to individual workspaces.
- Allow users to subscribe to relevant content based on their current locations.
- Toggle between your subscribed workspaces in the side menu, changing the app experience.

Community-Specific eGuides

Users easily interact with eGuides via built-in features, including menus, links, and bookmarks. Your Hospital Emergency-Ready app comes preloaded with three eGuides that you may choose from our extensive eGuide library.

Ready-to-Launch Content Packages

Our Content team has built packages that allow you to deliver immediate information to your people. Each package contains a minimum of five news articles, three checklists, two video links, one self-assessment or quiz, and one FAQ section featuring 10 or more relevant questions and answers.

Innovating with reliable content

Take ownership of staff safety – everywhere.

- ✓ A trusted two-way communication channel for staff preparedness
- ✓ Real-time alerts and safety status updates for immediate action
- ✓ Portable emergency planning tools and expert know-how at your fingertips
- ✓ A choice of eGuides from the QuickSeries content suites to fit your specific needs
- ✓ A cost-effective solution with a comprehensive set of feature-rich modules, including a valuable Authoring Tool CMS
- ✓ An evolving platform that adapts to the growing needs of your hospital

Don't wait until an emergency happens!

Be proactive and book your demo today to explore the power of the Hospital Emergency-Ready app platform. Get started now and take the first step in providing a safer and more secure environment for your staff and patients.
